Feel the Water

El agua es vida. Sólo con verla y oírla, aumenta el flujo sanguíneo en el cerebro y el corazón, y nos relaja.

En Genebre sabemos la gran variedad de beneficios que sólo el agua puede ofrecer. Por eso seguimos mejorando continuamente nuestros productos para que tu experiencia con el agua sea cada día mejor. Esa es nuestra razón de ser y lo que en realidad mejor sabemos hacer.

Water is life. Just seeing and hearing it increases the blood flow in the brain and heart, and relaxes us.

At Genebre, we know the great variety of benefits that only water can offer. That's why we continue improving our products so that your experience with water is better every day. That is our reason for being and what we really know best how to do.

Feel the quality

En Genebre podríamos hablarte de los rigurosos exámenes que organismos de certificación independientes han realizado a todos nuestros productos (laboratorios ENAC, laboratorio Oliver Rodés).

También podríamos aburrirte enumerando las complejas normativas que cumplen nuestros productos (la ISO 9001, la ISO 14001, la UNE-EN 19703, la EN 1982, la CW617N, la EN 12165, la ISO 9227, la EN 200, la NF 077, la EN1717, ...).

O maravillarte con las numerosas pruebas de resistencia a las que sometemos a nuestros productos antes de que salgan al mercado (discos cerámicos capaces de resistir más de 200.000 maniobras, giro de los caños que después de más de 80.000 accionados siguen como el primer día, cromados resistentes a la corrosión, plásticos anticalcáreos, el latón y sus aleaciones, etc...).

Pero por encima de todo, queremos hablarte de nuestro compromiso con la calidad y la salud, del ahorro de agua y energía o de la garantía y la asistencia técnica con la que nos encontrarás siempre a tu lado.

Homologación CE y otras específicas para mercados como Bielorrusia, Chile, Polonia, Rusia, Ucrania, Singapur y Arabia Saudí.

At Genebre we could tell you about the rigorous examinations that independent certification institutions have carried out on our products (ENAC laboratories, Oliver Rodés laboratory).

We could also bore you just by listing the large list of regulations that our products comply with (ISO 9001, ISO 14001, UNE-EN 19703, EN 1982, CW617N, EN 12165, ISO 9227, EN 200, NF 077, EN1717, ...).

Or marvel you with the numerous resistance tests that we always undergo internally to our products before they are launched on the market (ceramic discs capable of withstanding more than 200,000 maneuvers, turning of the pipes that after more than 80,000 actuation continue as the first day, corrosion-resistant chrome plating, anti-limescale plastics, brass and its alloys, etc ...

But above all, we want to talk to you about our commitment to quality and health, saving water and energy or the guarantee and technical assistance with which you will always find us by your side.

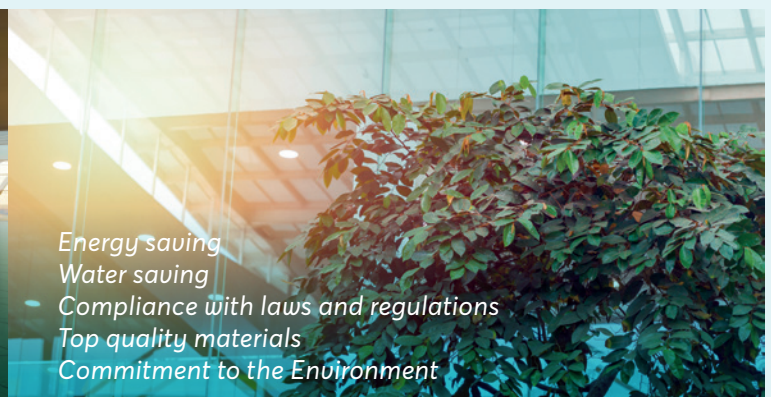

EC homologation and other specific certifications for markets in Belarus, Chile, Poland, Russia, Ukraine, Singapore and Saudi Arabia.

Ahorra agua, ahorra energía.

Innovación, tecnología y responsabilidad medioambiental se fusionan en la serie más ecológica de su gama. Su innovador sistema de apertura en frío que ayuda a ahorrar agua y energía la hace totalmente sostenible. Además, es muy cómoda porque el caudal se regula con mayor facilidad. Una colección ideal para el nuevo estilo de vida.

Save water, save energy.

Innovation, technology and environmental responsibility merge in the most ecological series of its range. The innovative cold opening system helps to save water and energy, making it totally sustainable. In addition, it is very comfortable because the flow is regulated much more easily. An ideal collection for a new style of life.

Kelogic

La serie más ecológica The most environmental-friendly series

Apertura en frío Kelogic

La principal característica de esta serie es el ahorro de energía. Al abrir el grifo en su posición central, únicamente saldrá agua fría. El agua caliente no saldrá mientras no giremos la maneta hacia la izquierda. De este modo, nuestro sistema Kelogic evita que su caldera o calentador se ponga en marcha innecesariamente.

Cold start, Kelogic

The main advantage of this serie is energy savings. When you open the tap from its central position, only cold water is used, and hot water only flows when the level is moved to the left. Energy is saved because our Kelogic system switches on the water heater only when necessary.

Nuestros conectores con regulador de caudal para ducha y aireadores antical economizadores ideales para grifos, harán que tus instalaciones sean más eficientes en el consumo de agua y energía.

Consumo más sostenible

Gracias al sistema de regulación dinámica, la reducción se produce sea cual sea la presión del agua.

En los aireadores, su mezclado de agua con aire ofrece una gran sensación de confort, a la vez que se reduce el consumo, haciéndolo más eficiente y sostenible. Además, al reducir su caudal, también se ahorra energía en la fase de calentamiento del agua.
